PROFESSIONAL SUMMARY

Backend Engineer with **2+ years of experience** in system design and building scalable distributed systems at Groww. Delivered platforms processing **76M+ daily communications**, optimized services at **400K RPM**, and drove a CRM migration that reduced vendor costs by **INR 40–60L/month**. Proficient in **Java, Spring Boot, GoLang, Python, Scala, Apache Spark, Apache Kafka, Redis, MySQL, Kubernetes**, and **Docker**.

EXPERIENCE

Software Development Engineer 1 (SDE 1)

July 2024 – Present

Groww – Engagement & Communications Platform

Bengaluru, India

- Designed and delivered a **journey analytics platform** for Groww's in-house CRM, tracking **60M+ daily push notifications** across **50+ configurations** and enabling a CRM switch that saved **INR 40–60L/month** in vendor costs.
- Built **node-level and rule-level analytics** for complex user journeys, providing detailed metrics on event-based tracking and funnel performance for **100+ active marketing campaigns**.
- Developed a **CG/TG experimentation framework** for 7-day conversion tracking, driving **10–15% conversion uplift** by identifying and fixing journey misconfigurations.
- Implemented a real-time **F&O streaming pipeline** using **Apache Spark and Kafka**, unifying mismatched-schema tick data across **5,000+ instruments** and producing consolidated streams for **16M+ daily communications**.
- Optimized MessageBoard at **400K RPM** — reduced redundant API calls by **33%** and re-engineered campaign pipeline with **batch Kafka consumption**, async CSV processing, and **batched DB/Redis ops**, achieving **80x throughput** (20K → 1.6M MBs/min).
- Integrated **real-time dynamic segments** with state-based Kafka consumer logic and custom **AND/OR/NOT evaluation**, driving real-time MB creation on user segment transitions — deployed for **MTF compliance notifications**.
- Owned **3 production microservices** (WhatsApp, MessageBoard, Device-Mgmt), integrated WhatsApp vendor dispatching **0.56M+ messages/day**, and led **CI/CD migration** to **Argo CD** for **8+ services**.

Software Development Engineer Intern

January 2024 – June 2024

Groww – Engagement & Communications Platform

Bengaluru, India

- Designed **MultiTenancy architecture** for MessageBoard service, scaling data segregation to support **4 applications** and **10 tenants** across business units.
- Deployed **CircuitBreaker pattern** for Story service, improving availability to **99.9%**, and executed cross-cluster service migration with **Kafka consumer pipelines** for database synchronization.
- Delivered **ReactJS frontend** for MessageBoard with full Multitenancy support, serving internal teams across **4 product verticals**.

EDUCATION

Indian Institute of Information Technology, Nagpur

Nagpur, India

Bachelor of Technology in Electronics and Communication Engineering; CGPA: 8.44/10 November 2020 – July 2024

PROJECTS

Cash-flow Management Application

(MongoDB, ExpressJs, ReactJs, NodeJs, ChartJs, ContextAPI)

Github – Live

- Built a full-stack finance tracker with **MERN stack, JWT authentication**, role-based access control, and **RESTful APIs** for income/expense CRUD with category-based filtering.
- Developed interactive dashboard using **Chart.js** with **4 chart types** (bar, line, pie, doughnut) for real-time financial insights and data visualization.

TECHNICAL SKILLS

Languages & Databases: Java, GoLang, Python, Scala, SQL, MySQL, MongoDB, Redis, JS

Frameworks & Tools: Spring Boot, Spark, Kafka, React, K8s, Docker, Argo, Airflow

ACHIEVEMENTS & CODING PROFILES

- Solved **800+ problems** on LeetCode, GFG, CodeChef, HackerRank; earned **5-star badges** in DSA, C++, and C.
- Completed UIUC's **CS Fundamentals** specialization and Imperial College's **Math for ML** with distinction.
